ABOUT

Our world is crumbling. Demon armies have marched through their horrid portals on a genocidal campaign. As if the blood-thirsty monsters were not enough, a plague swept over the lands and claimed nearly every human left standing. Fate gave us control over the mysterious magical forces fueling the demon troops; those of us left may yet survive. Our civilization is ruined, our leaders are dead, and our hope is a fleeting dream.

Humanity needs a catalyst to change their course in this war. Join the tattered remains of our species in this long-form role playing game. Weave a rich story between a game master and a group of survivors in this alternate-present reality. Embody compelling characters with Catalyst's classless character system. Engage in tense battles with our unique card-based combat. Attempt to save the world or just live to see the next day.
