

Wager Words

The Simultaneous Bidding Word Game
By: Allysha Tulk & Kevin Carmichael

An interactive word game of frantic spelling and persuasion. Players place bids, spell words, and have light hearted debates on which words score.

In Wager Words you spell as many words as you can relating to various categories to score points. But do it fast because you only have 1 minute! When it comes to scoring, your opponents are the ones who have final say on whether your words count so you may need to do some convincing. If that's not your forte, you can still earn big points by reading the table and knowing the spelling capabilities of your opponents.

2017 Showcase Finalist and Nominee for Most Innovative and Best Game in Progress

Wager Words revolutionizes word games by putting the focus on the players instead of the words. It rewards those who are clever, quick, simple, sly or just plain likeable. It creates instant bonding experiences by placing players in a shared high stress situation and then asking them to present what they got, convince their friends, and have a laugh. For these reasons, Wager Words has proven time and time again to be the word game most loved by non-word gamers everywhere.
