app for Android or
iOS

INVESTIGATE

Use your **phone** to choose whether you want your **Confidential Informant** to investigate suspects or weapons. Then listen carefully, as your confidential informant gives you **secret clues**.

EXAMINE

One player requests the examination. The game will reveal whether the suspect and weapon have a **solid alibi**, if one of them is **suspicious**, or if you found the murderer and the murder weapon and **solved the case**. If you did not solve the case, a **new day dawns...**

The **clues** tells you which suspects have solid alibis or which weapons were cleared of DNA traces.

Agree on a **suspect** and **weapon** that you want to **cross-examine**.

DEDUCE

With the help of your secret **confidential informant** and your **examine reports** you can collectively sort your information. Maybe you can figure out how the murder was **committed**.

SHOOT

Just remember, at least one **dirty cop** is protecting the murderer and forestalling your investigation.

At any time in the game, you can shoot another player! You only have **one bullet** so you better be sure before pulling the trigger. When a player **dies** the game is over - if an honest cop died, the dirty cops win and vice versa.
